WORK EXPERIENCE

- **Full Stack Developer**   **Poulima Infotech**
  March 2023-current   Bangalore (WFH)
  Working on various web applications and mobile apps, integrating payment gateways like Instamojo and Stripe, and utilizing technologies like AWS S3 bucket and EC2 instances for hosting

- **Full Stack Developer Intern**   **Poulima Infotech**
  October 2022-March 2023   Bangalore (WFH)
  During my internship, I gained hands-on experience in developing web applications, including projects like a job searching website and an astrology website using astrology APIs.

PROJECTS

Gallery Studio Pro (Full Stack Developer)

- Designed and built a web platform tailored for photo studios, enabling users to create clients, upload various media types, and securely share access credentials with clients.

- Employed Reacts for the frontend, harnessed Redux for state management, utilized AWS 53 for efficient storage, and relied on Google Auth for authentication. Additionally, a robust file management system was created, allowing users and clients to mark important and approve, comment on files, delete files and folders, with seamless payment processing through Stripe integration.

Bhagyavakta (Full Stack Developer)

- Developed a versatile astrology mobile app and website, offering features such as kundli creation, match making reports, panchang, horoscope viewing, and more.

- Leveraged React Native for the mobile app, React and Redux for the web platform, integrated astrology APIs, implemented Formik and Yup for form validation, and incorporated instamojo for secure payment processing, with added support for multiple languages through Google Translation API.
