PROFESSIONAL SUMMARY

Detail-oriented and results-driven **Software Developer** with **3+ years of experience** in building scalable backend and full-stack systems for product-based platforms. Currently working on **ReturnPrime (a GoKwik product)**, designing event-driven architectures using **Node.js, MongoDB, Kafka**, and **Redis**, supporting **2000+ Shopify stores** in production. Proven expertise in **system decoupling, asynchronous processing, logistics integrations, and production issue handling**. Adept at working in Agile teams, coordinating with CSMs and merchants, and delivering reliable, high-performance software solutions.

TECHNICAL SKILLS

Programming & Scripting: JavaScript (ES6+), TypeScript, Node.js, HTML5, CSS3
Frontend Development: React.js, Redux Toolkit, React Query, Next.js, Tailwind CSS, Material UI, Axios, React Router, Vite
Backend & API Development: RESTful APIs, GraphQL, Express.js, NestJS, Kafka, Razorpay API Integration
Database Management: MongoDB, PostgreSQL, MySQL, Redis
Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway, IAM, CloudWatch), Docker, Kubernetes (EKS), GitHub Actions, Linux
CI/CD & Infrastructure Automation: GitHub Actions, Docker, Kubernetes
Authentication & Security: JWT, OAuth 2.0, API Key Auth, AWS IAM, Role-based Access Control (RBAC)
Testing & Quality Assurance: Jest, React Testing Library, End-to-End (E2E) Testing
Project Management & Collaboration: Agile/Scrum, Jira, Confluence, Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Developer, Bestpeers Infosystem Pvt. Ltd. June 2025 – Present

- Designed and developed scalable backend services for **ReturnPrime (GoKwik product)** using **Node.js and MongoDB**, supporting **2000+ Shopify stores** with high availability.
- Architected **Kafka-based producer-consumer** services for product and collection synchronization, decoupling Shopify webhook traffic from the core backend and **reducing load on the main system by ~15–20%**.
- Built an **AWB producer-consumer services** using **Kafka and Redis**, exposing webhook endpoints to logistics partners for real-time shipment and order status updates.
- Implemented **asynchronous processing with retries and idempotent consumers**, reducing data inconsistencies and sync failures by **~20%**.
- Integrated multiple **logistics partners** via **DIY platform and automated backend flows**, improving merchant onboarding efficiency and logistics coverage.
- Delivered the **Carry Forward Discount enhancement**, allowing merchants to configure **value-based or percentage-based discount carry forward**, improving business flexibility.
- Handled **on-call production issues**, debugging live PROD incidents and coordinating with **CSMs and merchants** to ensure SLA adherence and platform stability.

Software Consultant, Cornerstone Solutions February 2024 – May 2025

- Worked on enterprise applications **UAMTEC** and **VitalIX**, delivering features and resolving complex issues across backend and frontend layers.
- Optimized backend logic and database queries, improving API response times by **20–25%** for critical workflows.
- Improved application performance and usability through frontend optimizations and better data-fetching strategies.
- Implemented advanced functionalities such as **seamless image navigation** and **custom EXE setup creation**, streamlining deployment workflows.
- Collaborated closely with QA and product teams to ensure production stability and timely feature delivery.

Software Developer, Poulima Infotech October 2022 – February 2024

- Designed, developed, and maintained **web and mobile applications** using **Node.js, React, and React Native** for multiple client projects.
- Built reusable backend modules and REST APIs to support authentication, payments, and data-driven workflows.
- Integrated **Razorpay, Stripe, and Instamojo** payment gateways, ensuring secure and reliable transaction handling.
- Deployed and managed applications on **AWS (EC2, S3)**, handling builds, environment setup, and production releases.
- Worked extensively with third-party APIs, form validation, and error handling to improve reliability and user experience.

PROJECTS

eCanteen

- Developed a college canteen web app reducing peak-hour queues by 60% via pre-orders and dynamic rush-hour analytics.
- Integrated Razorpay payments to process 500+ monthly orders, increasing canteen revenue by 30% with combo deals.
- Tech: **React, Node.js, MongoDB, Bootstrap** and **Razorpay API**.

EDUCATION

Rajiv Gandhi Proudtyogiki Vishwavidyalaya, Bhopal June 2019 - July 2023
Bachelor of Technology in Computer Science CGPA : 8.12/ 10.00
